

PLANNING & DEVELOPMENT

Building & Development

A quick reminder for residents when it comes to planning and development in the Village.

If you are planning to build, construct, renovate, or make changes to your property and you are unsure whether a permit is required, please contact the Office before you begin.

It is always better to ask first than to find out afterward that a permit or approval was required.

Following the proper process from the beginning can help prevent unnecessary costs, complications and delays for property owners and developers. These processes are in place to help ensure that development is safe, and compliant. They also help protect property owners and the Village by ensuring that work is completed appropriately and that the necessary information and approvals are on record.

To help with clarity, our zoning bylaw is being worked on and will be undergoing much-needed updates. The goal is to create clearer, more current regulations that better reflect the needs of our growing community and provide residents and developers with a better understanding of what is permitted.
